

- The Revpro lighting bar has been designed for use in theatres, school drama spaces, clubs, exhibition spaces and anywhere else you may need a lighting bar solution. It is attractive, lightweight and very strong.
- Manufactured in Australia from extruded aluminum with a black powder coated finish, and can be supplied in other colours. It has multiple hanging and fixing options which can be modified to suit varied requirements.
- These bars can be dead hung, hand winched or electric winched, which make this the most versatile, robust and complete LX Bar on the market.
- Dual channels separate the power and the data, avoiding electrical interference and guaranteeing Australian electrical regulations.
